## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 1/28/2004 has been considered by the examiner.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen et al (4,810,601), Mimura et al (4,751,170), Ito et al (5,407,786), or Han (DE 4331519 in view of its English language abstract).

All of the above cited references clearly teach methods of structuring a photoresist layer and underlying substrate employing the steps of coating a layer of polymerizable resist onto a substrate, exposing the layer through a mask as instantly claimed, applying a silylation reagent, then using the patterned and silylated layer as a mask to etch (using RIE) the underlaying substrate to achieve a semiconductor device. These teachings appear to anticipate the instant claims.
